2. Risk Analysis

Detailed risk metrics, historical drawdown, and forward-looking simulation.

Risk Metrics Detail			
VaR (95%)	-1.32%	CVaR (95%)	-1.78%
Volatility	13.0%	Backtest CAGR	-6.6%
Max Drawdown	-16.3%	Total Return	-6.6%
Sortino	-1.29	Beta	0.88
VaR (99%)	-2.08%	Correlation	0.89
Stock Count	7	Sharpe	-0.96
Calmar Ratio	-0.41	Treynor Ratio	-14.86
Skewness	0.031	Excess Kurtosis	1.276

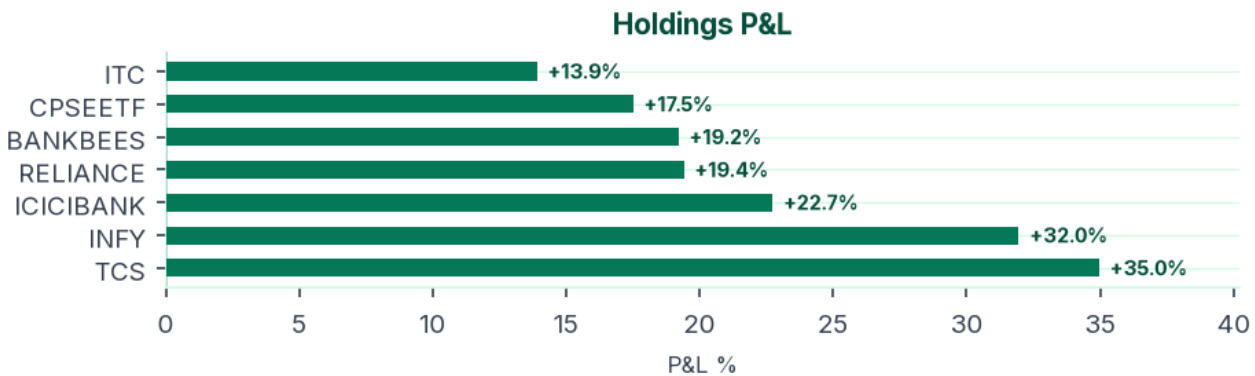

Top Priority Actions

- **DIVERSIFY Banking:** Banking occupies 29.8% of your portfolio, well above the 20% prudent limit. A single adverse sector event (regulatory change, earnings miss, commodity shock) could erase 30%+ of portfolio value in days. (near-term, 85% confidence)
- **DIVERSIFY IT:** IT occupies 23.8% of your portfolio, well above the 20% prudent limit. A single adverse sector event (regulatory change, earnings miss, commodity shock) could erase 24%+ of portfolio value in days. (near-term, 85% confidence)
- **DIVERSIFY Equity:** Banking: Equity: Banking occupies 20.9% of your portfolio, well above the 20% prudent limit. A single adverse sector event (regulatory change, earnings miss, commodity shock) could erase 21%+ of portfolio value in days. (near-term, 85% confidence)

3. Holdings Breakdown

Per-holding P&L; and detailed position data.

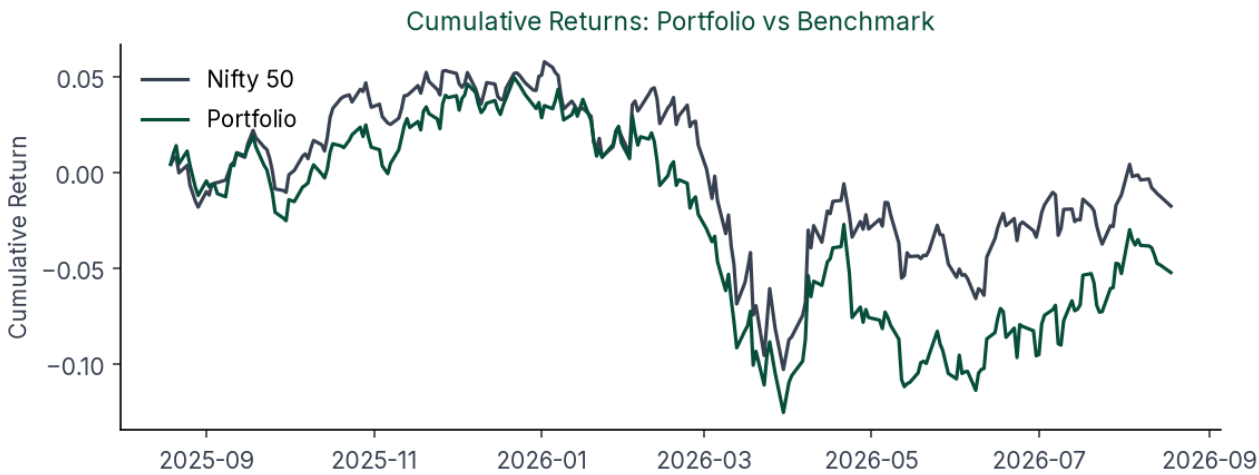

Ticker	Name	Quantity	Avg Price	Current Price	P&L; %	Sector
RELIANCE	Reliance Industries	10	1100.0	1313.4	+19.4%	Oil & Gas
TCS	Tata Consultancy Services	5	1700.0	2294.3	+35.0%	IT
INFY	Infosys	20	850.0	1121.6	+32.0%	IT
ITC	ITC Ltd	50	240.0	273.35	+13.9%	FMCG
ICICIBANK	ICICI Bank	30	1150.0	1411.4	+22.7%	Banking
BANKBEES	Nippon India ETF Nifty	50	500.0	596.0	+19.2%	Equity: Banking
CPSEETF	CPSEETF	100	80.0	94.0	+17.5%	Unknown

4. Benchmark Comparison

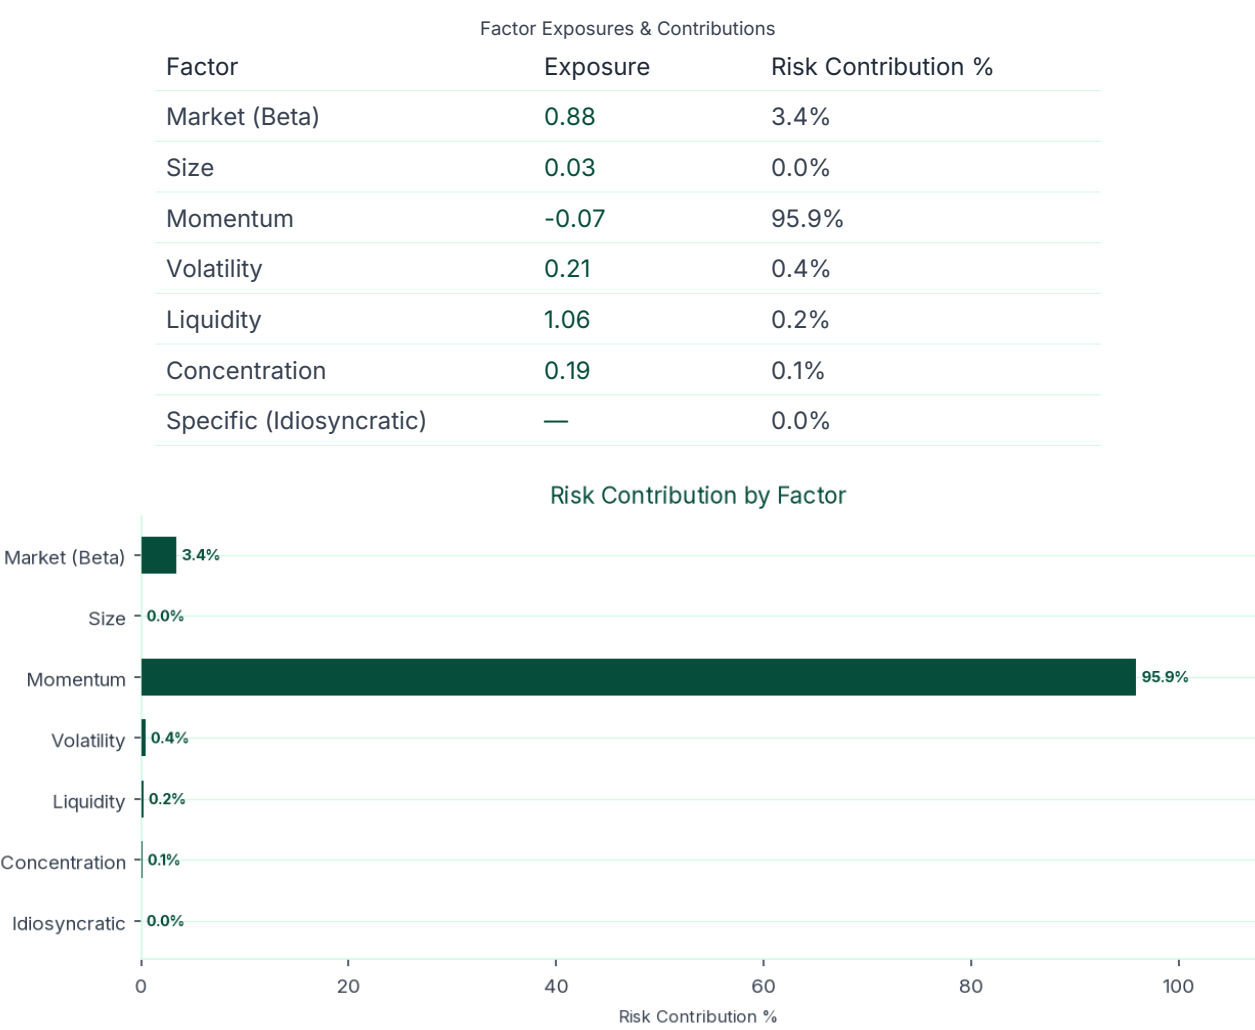

Portfolio performance relative to Nifty 50 benchmark.

Benchmark Comparison Metrics			
Beta	0.88	Alpha (ann.)	-3.31%
Information Ratio	-0.57	Tracking Error	6.21%
Correlation	0.89	Up Capture	87.37%
Down Capture	92.26%		

5. Factor Risk Decomposition

Risk attribution across systematic factors and idiosyncratic component.

Dominant factor: Momentum — 100.0% of total risk is explained by the factor model; the remaining 0.0% is idiosyncratic.

6. Macro Drivers, Scenarios & Institutional Scores

Macro Factor Sensitivities

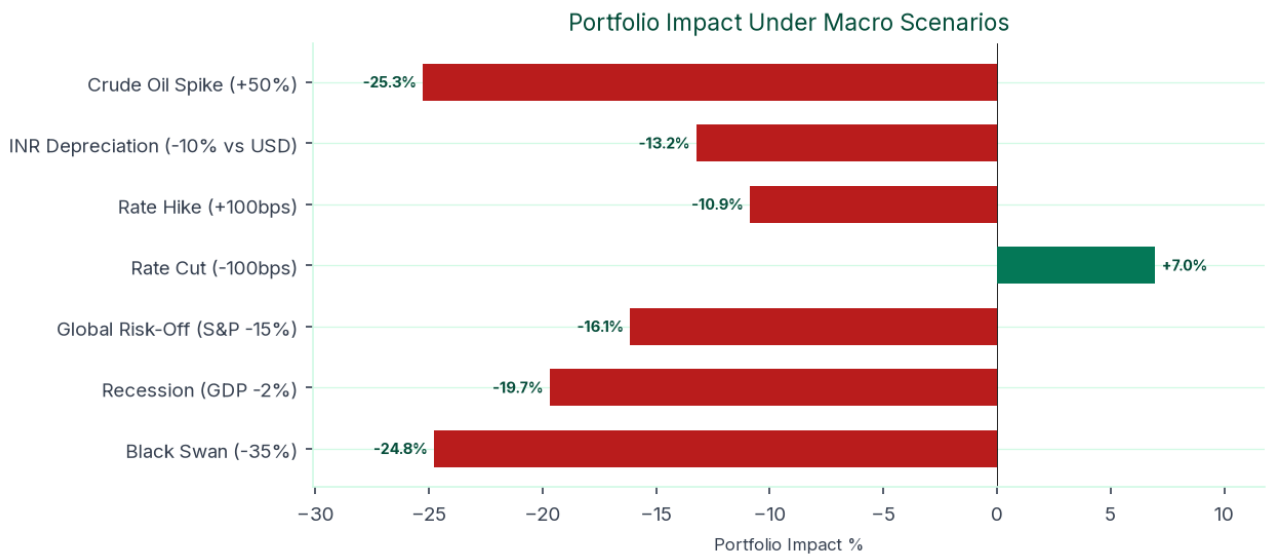

Portfolio sensitivity to key macroeconomic drivers (rolling regression).

Macro Driver Sensitivities			
Driver	Sensitivity	Regime	Risk Level
Crude Oil	0.074	neutral	low
Interest Rates	0.609	unfavorable	high
INR/USD (Currency)	0.143	neutral	low
Global Risk Sentiment	0.883	neutral	low
Credit Quality	0.298	neutral	medium

Macro Stress Scenarios

Portfolio impact under hypothetical macro scenarios.

Scenario Analysis				
Scenario	Market Move	Portfolio Impact %	Severity	Probability
Crude Oil Spike (+50%)	-30.0%	-25.26%	severe	medium
INR Depreciation (-10% vs USD)	-15.0%	-13.23%	moderate	medium
Rate Hike (+100bps)	-12.0%	-10.87%	moderate	high
Rate Cut (-100bps)	+8.0%	6.95%	mild	medium
Global Risk-Off (S&P; -15%)	-20.0%	-16.14%	severe	medium
Recession (GDP -2%)	-25.0%	-19.68%	severe	low
Black Swan (-35%)	-35.0%	-24.77%	extreme	low

Institutional Risk Scores

Multi-factor institutional scoring framework (0-100; higher = riskier for risk metrics, higher = stronger for conviction).

Institutional Scores			
Overall Risk	30.7	Conviction	55.4
Portfolio Stress	72.6	Hidden Correlation	36.6
Tail Risk	18.0		

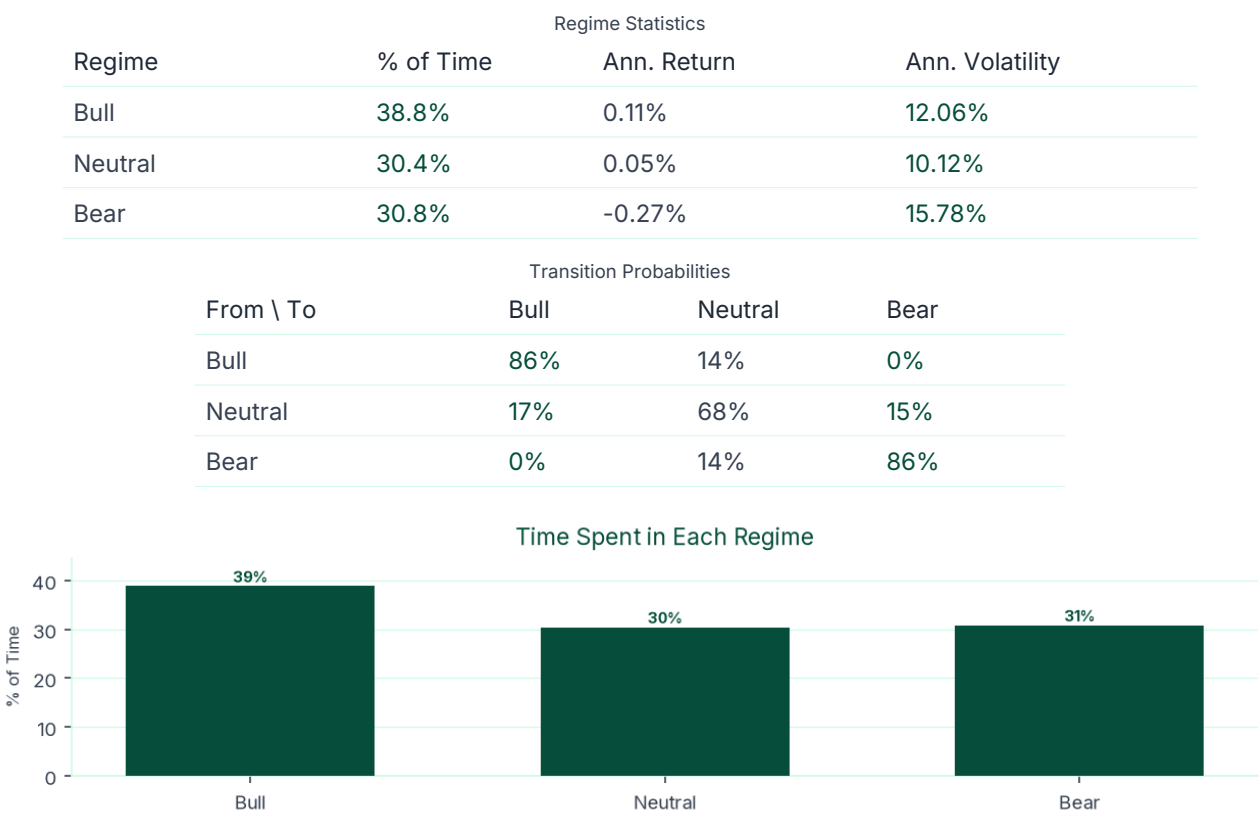

LOW RISK: Portfolio is well-positioned with conservative risk characteristics. Portfolio is under elevated stress — current market conditions are adverse for this positioning.

7. Regime Analysis & Advanced Metrics

Market Regime Detection (HMM)

Hidden Markov Model regime identification and transition probabilities.

Current Regime: Neutral

Advanced Risk Metrics

Advanced Metrics	
Altman Z-Score (portfolio proxy)	-8.00
VaR Backtest (Kupiec p-value)	0.874
VaR Breaches (95%, 1y)	13
GARCH(1,1) 1-day Vol Forecast	N/A
Skewness	0.031
Excess Kurtosis	1.276
Calmar Ratio	-0.41
Treynor Ratio	-14.86
